## How to Calculate - Siding

Starting in 2018, it is no longer necessary to convert your order into pmp. Order your siding in covering sq. ft. and your trims in lin. ft. Your order will be confirmed and invoiced in these units of measure.

How to calculate the amount of siding needed Example - Area to cover: 1,000 sq. ft.

## REGULAR AND MAIBEC EM+ ${ }^{+}$SIDING

## 1 Area to cover

$1^{\prime \prime} \times 6$ " rabbeted bevel
$1,000 \mathrm{sq}$. ft.
2 Add 3\% for losses due to cutting
Amount in sq. ft. $\times 1.03$
$1,000 \mathrm{sq}$. ft. $\times 1.03=1,030 \mathrm{sq}$. ft.
> Total amount: $1,030 \mathrm{sq} . \mathrm{ft}$.

## BOARD \& BATTEN PROFILE

## 1 Area to cover

1" $\times 10$ " board
$1,000 \mathrm{sq} . \mathrm{ft}$.
2 Add 3\% for losses due to cutting Amount in sq. ft. $\times 1.03$ $1,000 \mathrm{sq} . \mathrm{ft} . \times 1.03=1,030 \mathrm{sq} \cdot \mathrm{ft}$.
> Total amount of 1 " $\times 10^{\prime \prime}$ board to order: 1,030 sq. ft.
3 To calculate the amount of 1" x 2" batten, multiply the total amount of sq. ft. by $\mathbf{1 . 3 0}$ Batten must be ordered in linear feet. Multiply the amount of sq. ft. to cover by 1.30 1,000 sq. ft. $\times 1.30=1.300$ lin ft
4 Add 3\% for losses due to cutting 1,300 lin ft $\times 1.03=1,339 \mathrm{linft}$
> Total amount to order: $1,030 \mathrm{sq}$. ft. of board and 1,339 lin ft of batten

## TRIMS

Add a minimum of $5 \%$ to the amount for losses due to cutting.
